

NETSUITE BENEFIT OVERVIEW

The Universal Business System

NETSUITE IS:

A Universal Business System

A Universal Business System that provides the “Full Picture”

- Modules include ERP, CRM, HRA, PM, E-Com and more. NetSuite offers a modern, scalable solution to run all of your key business operations in the cloud. It's all you need to remain agile.

Native Business Intelligence

- Real-time analytics is part of the NetSuite user interface. Users can be confident that they have the visibility and control to make the right decisions and grow their business.

Cloud-based Benefits

AGILE:

Run your entire business from anywhere – even if you're working from home.

- NetSuite was built from the ground up for the cloud. You can be confident that your dispersed teams can rely on NetSuite's connectivity and security.

FLEXIBLE:

Start small, scale up, spin off, or adopt new business models, quickly and easily.

- With every NetSuite upgrade, your configurations and customization migrate seamlessly. You will never experience an upgrade lock out!

SCALABLE:

Gain the agility, flexibility and scalability your business needs to power innovation and growth.

- Small companies to large enterprises use NetSuite. It is a highly scalable system that can quickly and easily add functionality as business grows.
- NetSuite's international capabilities include support for 190 currencies, 27 languages and automated tax compliance in over 100 countries to fuel global expansion.
